

Crowe Construction Contract Optimizer

Steps as a subscriber

**That was
so easy!**

**This is great! I'm
able to focus my
time maximizing
the tax benefits
for my company.**

With the click of a couple buttons, look-back interest is calculated using prior year information already in the software.

Log in to the
Crowe Construction
Contract Optimizer™
solution online

In the first year, walk step-by-step through the process of making job decisions for tax purposes (like aggregating and segregating projects).

**The Crowe Construction
Contract Optimizer solution
simultaneously tracks
alternative minimum tax
implications and state
apportionment information
when applicable.**

Respond to audits with more accuracy and confidence. With all the documentation stored in one place, reports are generated and detailed information is gathered. This includes job-specific information that can be easily accessed, which reduces the chance of errors.

Upload or directly connect to input data into the Crowe Construction Contract Optimizer solution.

**Once calculations are run,
the Crowe Construction
Contract Optimizer solution
allows you to review
and analyze the results.**

Run easy-to-read reports that provide exactly what needs to be reported on your tax return and where to report to it.
