

Crowe Batch Process Manager
for Microsoft Dynamics® AX

Optimize batch job processing across entities

With the Crowe Batch Process Manager, you can easily create, manage, and execute batch jobs, improving the efficiency and accuracy of your processes. The Crowe Batch Process Manager for Microsoft Dynamics AX is designed to help you streamline and standardize batch processes across multiple entities, saving you time by reducing manual, repetitive setup steps.

crowe.com/axapps

Benefits:

- Create, view, and manage batch jobs and batch job history in a single view within Microsoft Dynamics AX
- Publish and execute jobs across separate AX entities
- Customize your execution parameters, including when and how often a job should take place

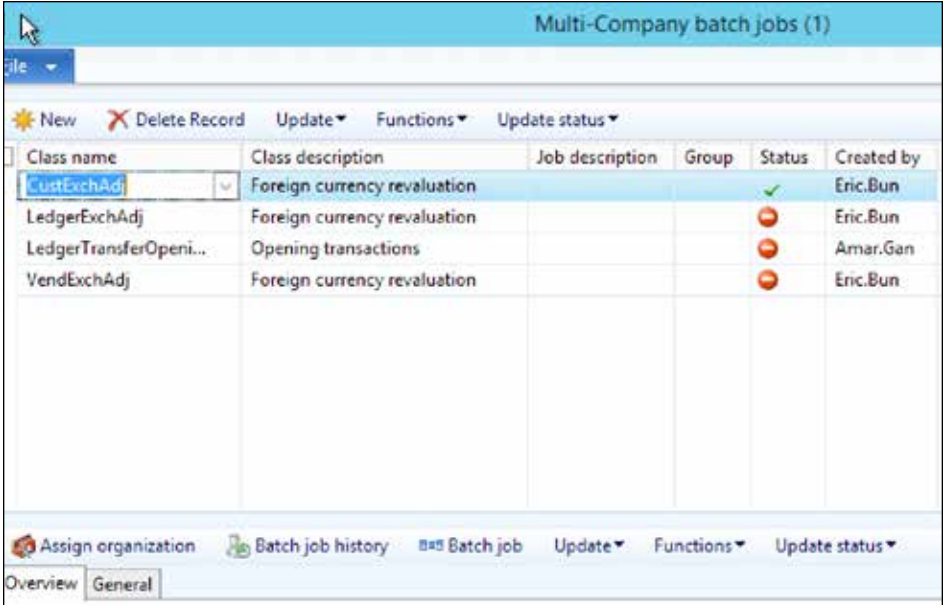

For purchasing information, request the purchasing guide: crowe.com/axappsguide

Batch process manager form

This form provides you with a comprehensive view of jobs, including job status and job history.

Features:

- View job status and “created by” details for each job
- Access batch run status and batch history
- Easily assign an organization and create a batch job

FAQs

Is this app only for executing IT jobs?

- No, this app was designed to help all areas of your organization. For example, finance batch jobs could include rolling your income statements forward, the revaluation of foreign currency transactions due to fluctuations with currency rates, or posting journal entries that have been approved.

Will we receive alerts once a job is executed?

- Yes, you can create alerts for each batch job that will be sent to each AX entity prior to the batch job executing.
