

Advanced technology assessments and implementations to protect, detect, and predict

Get to know Crowe for enhanced cybersecurity tailored to the TMT industry

Cybersecurity needs in the technology, media, and telecommunications (TMT) industry are dynamic and unique – and critical to a businesses' growth and success. Our scalable solutions and extensive TMT expertise offer what's needed to keep moving forward.

crowe.com/cyber

In the TMT industry, an effective cybersecurity program is crucial to not only protecting intellectual property, valuable information, and assets, but also in protecting consumers' trust. Our global team of specialists have extensive experience and expertise in helping TMT organizations develop an actionable path to elevate cybersecurity in a highly dynamic industry.

Using customized, advanced assessments, Crowe professionals can help TMT companies identify gaps or potential areas of weakness in existing cybersecurity programs. From designing and reviewing infrastructure upgrades or new projects to enhancing data security controls through penetration testing, Crowe can help TMT companies decide where to focus time and resources.

Crowe professionals can help TMT companies deliver software and solutions by identifying and addressing potential weaknesses prior to production. During the software development life cycle, Crowe can also provide cybersecurity insights and services to help TMT companies create and distribute products with robust data protection mechanisms written in the code and aligned with secure coding practices.

This customized, collaborative approach encourages innovation and continual advancements of the technology, people, and processes within TMT organizations. Crowe can support cybersecurity efforts, so TMT companies can drive performance and scale up with confidence.

Crowe quick facts

- One of the largest public accounting, consulting, and technology firms in the United States
- Deep industry specialization combined with accounting, consulting, and technology expertise
- More than 25 years working in the TMT industry and a dedicated team of more than 150 professionals
- 400-plus TMT clients of all sizes, from startups to large, publicly traded companies with a global presence
- Knowledge in industry subsectors, including software, hardware, internet of things (IoT), semiconductors, and telecommunications

Cybersecurity expertise and capabilities

Our integrated approach to cybersecurity follows the Crowe integrated cybersecurity framework, which delivers customized cybersecurity risk management services to help you strengthen your approach to IT governance and risk management, including:

- **Attack and penetration testing**
 - Provides a broad range of penetration testing, red team, purple team, and advanced security assessment services
- **Cyberresilience**
 - Evaluates preparedness, assesses risk mitigation, and establishes disaster recovery plans
 - Provides visibility to high-risk vulnerabilities to allow IT to make risk-based decisions via Crowe Security Insights, an automated, on-premises application designed to address cybersecurity vulnerabilities
- **Cybersecurity risk**
 - Helps navigate changing business conditions
 - Manages IT and cybersecurity risk with flexible, adaptable, and responsive services
- **Data privacy**
 - Enables data protection and compliance in a rigorous world of privacy regulations
- **Managed security services**
 - Outsourced advanced event detection capabilities
 - Incident response and investigation services
- **Solution implementation**
 - Design and implement proper controls to protect data and meet compliance expectations
