# Microsoft Azure™ Solution Support

Optimize your cloud usage with help from an experienced Azure solution and support provider.

The Microsoft Azure platform is a growing collection of integrated cloud services including analytics, computing, database, mobile, networking, storage, and web capabilities.

## **A Smoother Transition to the Cloud**

At Crowe, our specialists stand ready to help you realize the benefits of this open and flexible cloud service platform. Working with your team, our Azure-certified engineers can help you assess which of your existing workloads are best suited to migrate to the cloud.

Then, drawing on an in-depth understanding of the Microsoft Azure platform, Crowe professionals develop a detailed implementation and support strategy that reflects your organization's specific priorities. Finally, our team can work with you through the entire implementation process to help you make the transition with minimal disruption to your business.

## **Maximizing Capabilities of the Microsoft Azure Platform**

If your organization already employs the Azure platform, Crowe offers multiple levels of support for ongoing application maintenance and disaster recovery, as well as available 24/7 monitoring of all platform activities and performance. We can help you identify any needed infrastructure upgrades and alert you about opportunities to develop additional platform applications.

Specific Microsoft Azure service offerings from Crowe include:

- Cloud strategy and design
- Implementation and cloud migration
- Disaster recovery services and guidance
- Dynamic monitoring and scaling services
- Custom Azure-based solutions

Our goal is to help you maximize the return on your cloud investment by taking full advantage of the platform's capabilities, while at the same time making better, more informed business decisions that add value to your organization.
