

Crowe Production Scheduling and
Monitoring mobile application

Make production schedule adjustments from your phone

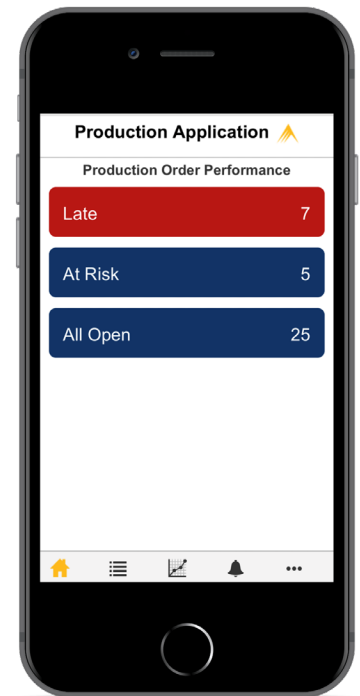

With the Crowe Production Scheduling and Monitoring mobile application, you can react to an ever-changing manufacturing environment by adjusting production schedules and resource assignments in Microsoft Dynamics™ 365 from your phone, anytime and anywhere.

Benefits

- React to what you see on the shop floor without needing to be at a computer
- Streamline day-to-day schedule maintenance decisions, enabling improved production order due date performance
- Use any device to access your Dynamics 365 data: mobile phones, tablets, and desktops
- Access real-time information about current operations across one or more facilities

Features

- Move jobs between machines based on the day's activities
- Re-sequence machine schedules based on order priority and changing due dates
- Check the current state of any production order through routing progress reporting
- View production order delivery performance with late, at-risk, and on-time order dashboards
