Physician Charge Integrity: What The Data Can Tell Us

Presented by Andrew Sudimack

August 29, 2018

Housekeeping

- Please note that all of today's audio is being broadcast to your computer speaker
- Please submit questions through the Q&A function on your screen. Questions will be addressed at the end of the presentation.
- To download a copy of the presentation or access the resources connected to this session, please visit the resources icon at the bottom of your console

Click the resource icon below
to download slides

CPE Details

CPE Credit

- Login individually to the session
- Minimum of 60 minutes on the session
- Successfully complete 3 of the 4 polling questions

NO CPE Credit

- Fail to successfully complete 3 of the 4 polling questions
- Viewing a recording of this session (CPE is only awarded for live sessions)

Upon completion of this program you will receive a post event evaluation

Your feedback is important

- CPE certificate of completion
- E-mailed within two weeks of upon successfully passing this program

Smart decisions. Lasting value.™

Physician Charge Integrity: What The Data Can Tell Us

Presented by Andrew Sudimack

August 29, 2018

Today's Speakers

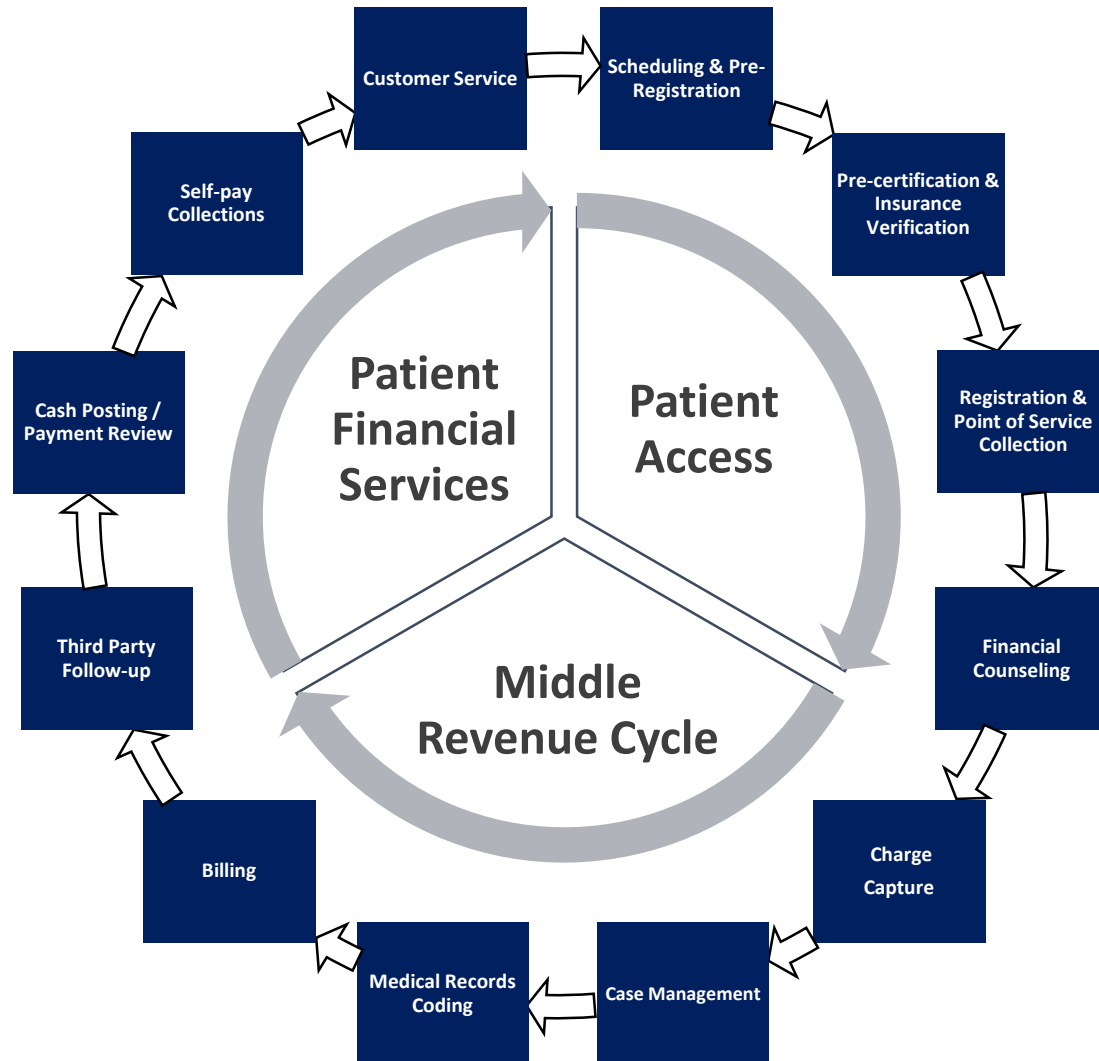

Andrew Sudimack

Andrew is a Manager within Crowe's Healthcare Performance practice. He has significant healthcare experience focusing on charge capture, CDM, clinical denials, utilization management, and coding compliance. Andrew is a Certified Professional Medical Auditor (CPMA).

Polling Question #1

- On a scale of 1-5, how would you rate your organization's current use of data in the physician revenue integrity process?
 - a) 1 (Data? What's data?)
 - b) 2
 - c) 3 (We have scratched the surface, but there's a lot of room for improvement)
 - d) 4
 - e) 5 (We are nearly optimizing the use of data in the revenue integrity process)

Understanding Revenue Cycle – Facility Model

Facility Model

- ☐ Organized and centralized
- ☐ Well-established and well-understood
- ☐ Structured internal support for revenue integrity (i.e. HIM, CDI, Case Management)
- ☐ Abundance of data-driven solutions in market

Facility vs. Professional Revenue Cycle Process

Facility Model

- ☐ Organized and centralized
- ☐ Well-established and well-understood
- ☐ Structured internal support for revenue integrity (i.e. HIM, CDI, Case Management)
- ☐ Abundance of data-driven solutions in market

Professional Model

- ☐ Disorganized and de-centralized
- ☐ Constantly evolving with changing regulations and market pressures
- ☐ Inconsistent levels of internal support
- ☐ Lack of significant, data-driven solutions in market

Factors Influencing Professional Revenue Cycle

- System acquisition of provider practices has significantly increased in recent years
- Multiple problems associated with practice integration:
 - Different EMR and documentation practices
 - De-centralized organizational structure
 - Inconsistent charge practices and education
 - Compensation structure
 - Data flow and oversight

Polling Question #2

True or False: The revenue cycle process for professional services differs from that of facility services in that all processes are performed by staff within the provider clinic.

- A) True
- B) False

Polling Question #3

True or False: In the past 3 years, the number of providers employed by health systems has leveled off due to fear of changing CMS regulations pertaining to provider-based billing clinics

- A) True
- B) False

Provider Revenue Integrity Structure

Front End Staff

- Patient scheduling and registration
- Authorization and Insurance Verification
- Collect co-pays and deductibles

Providers

- Clinical documentation of professional services and orders
- Select appropriate visit level and procedure codes for encounter

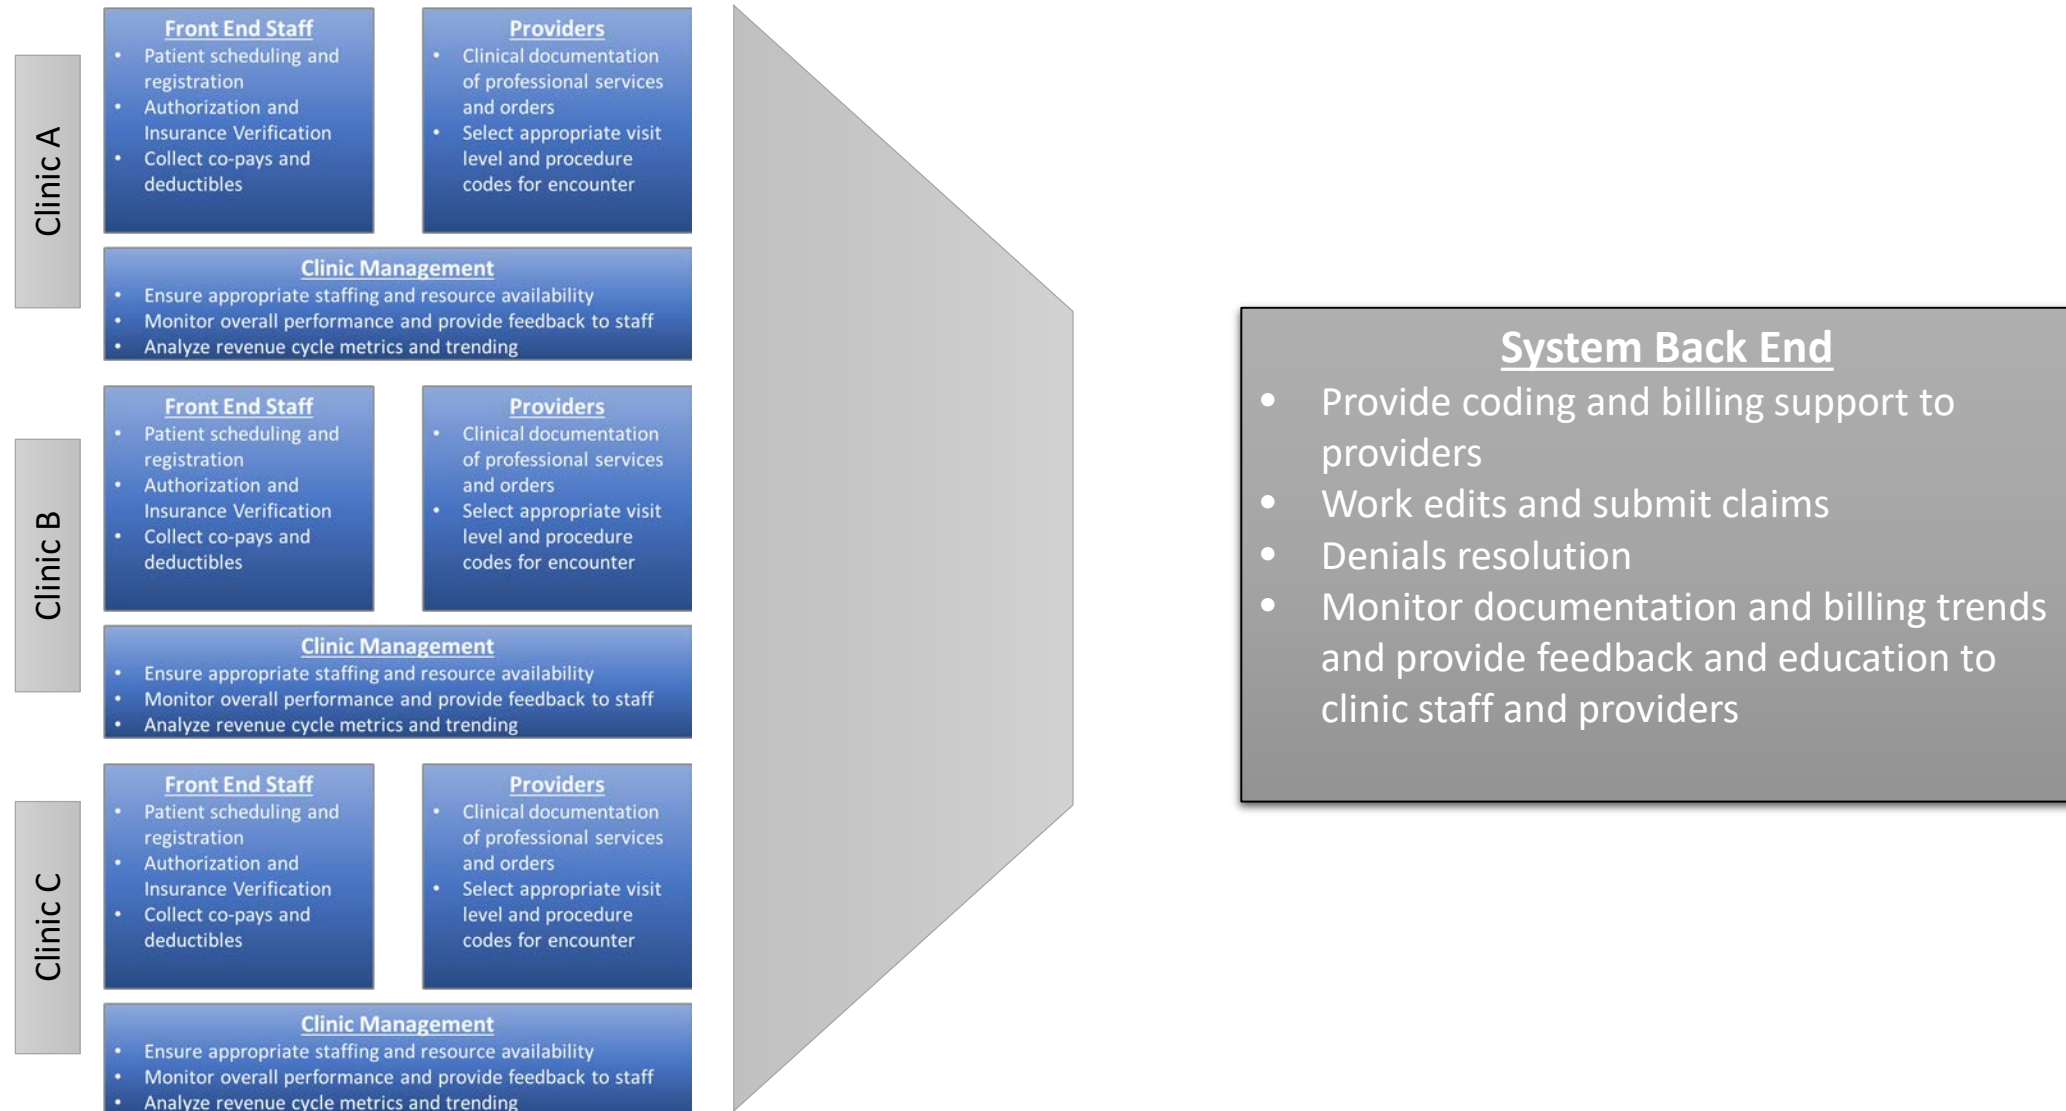

Back End Staff

- Monitor and resolve billing/coding edits
- Submit claims and post payment
- Denials resolution
- Provider education and feedback

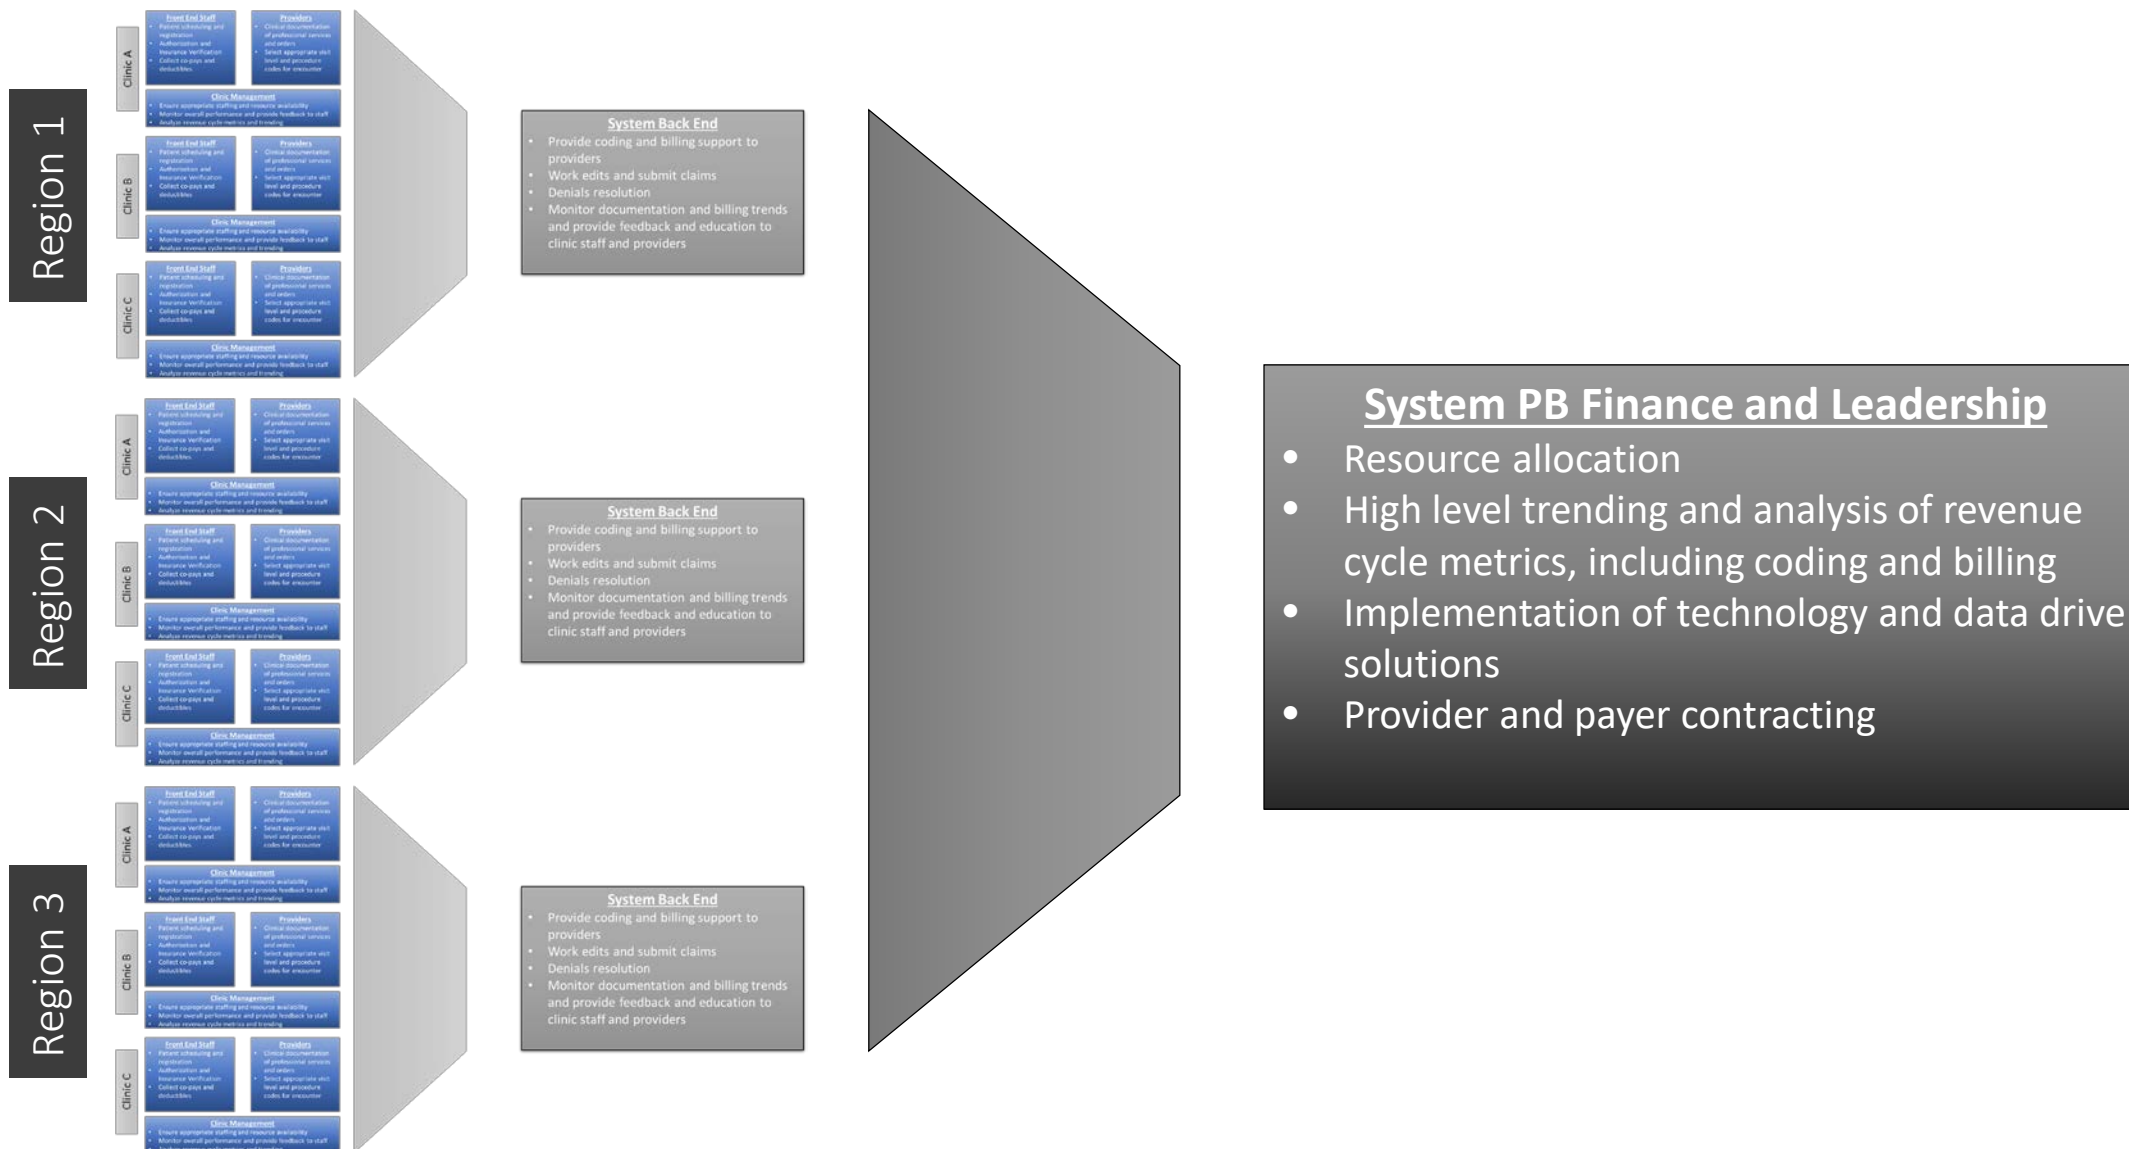

Clinic Management

- Ensure appropriate staffing and resource availability
- Monitor overall performance and provide feedback to staff
- Analyze revenue cycle metrics and trending

Provider Revenue Integrity Structure

Provider Revenue Integrity Structure

Polling Question #4

- Considering the organizational structure discussed, which of the following aspects of the revenue integrity process could potentially be impacted when a provider clinic is acquired by a health system?
 - a) Provider communication with back-end staff regarding billing trends and denials
 - b) Electronic Medical Record and documentation tools used by provider for clinic visits
 - c) Provider-Coder feedback processes
 - d) A and B only
 - e) All of the above would be impacted

Key Issues In Provider Charge Integrity

1. Inadequate Coding and Billing Support
2. Decentralization
3. Lack of Structured Feedback Mechanism

Region 1

Region 2

Region 3

Documentation and Billing

System Back End

- Provide coding and billing support to providers
- Work edits and submit claims
- Denials resolution
- Monitor documentation and billing trends and provide feedback and education to clinic staff and providers

System Back End

- Provide coding and billing support to providers
- Work edits and submit claims
- Denials resolution
- Monitor documentation and billing trends and provide feedback and education to clinic staff and providers

System Back End

- Provide coding and billing support to providers
- Work edits and submit claims
- Denials resolution
- Monitor documentation and billing trends and provide feedback and education to clinic staff and providers

System PB Finance and Leadership

- Resource allocation
- High level trending and analysis of revenue cycle metrics, including coding and billing
- Implementation of technology and data drive solutions
- Provider and payer contracting

Oversight and Support

Region 1

Region 2

Region 3

Data

System Back End

- Provide coding and billing support to providers
- Work edits and submit claims
- Denials resolution
- Monitor documentation and billing trends and provide feedback and education to clinic staff and providers

System Back End

- Provide coding and billing support to providers
- Work edits and submit claims
- Denials resolution
- Monitor documentation and billing trends and provide feedback and education to clinic staff and providers

System Back End

- Provide coding and billing support to providers
- Work edits and submit claims
- Denials resolution
- Monitor documentation and billing trends and provide feedback and education to clinic staff and providers

Analysis and Trending

System PB Finance and Leadership

- Resource allocation
- High level trending and analysis of revenue cycle metrics, including coding and billing
- Implementation of technology and data drive solutions
- Provider and payer contracting

Target Actual

Procedure Utilization at all Clinics - Excluding E&M Codes

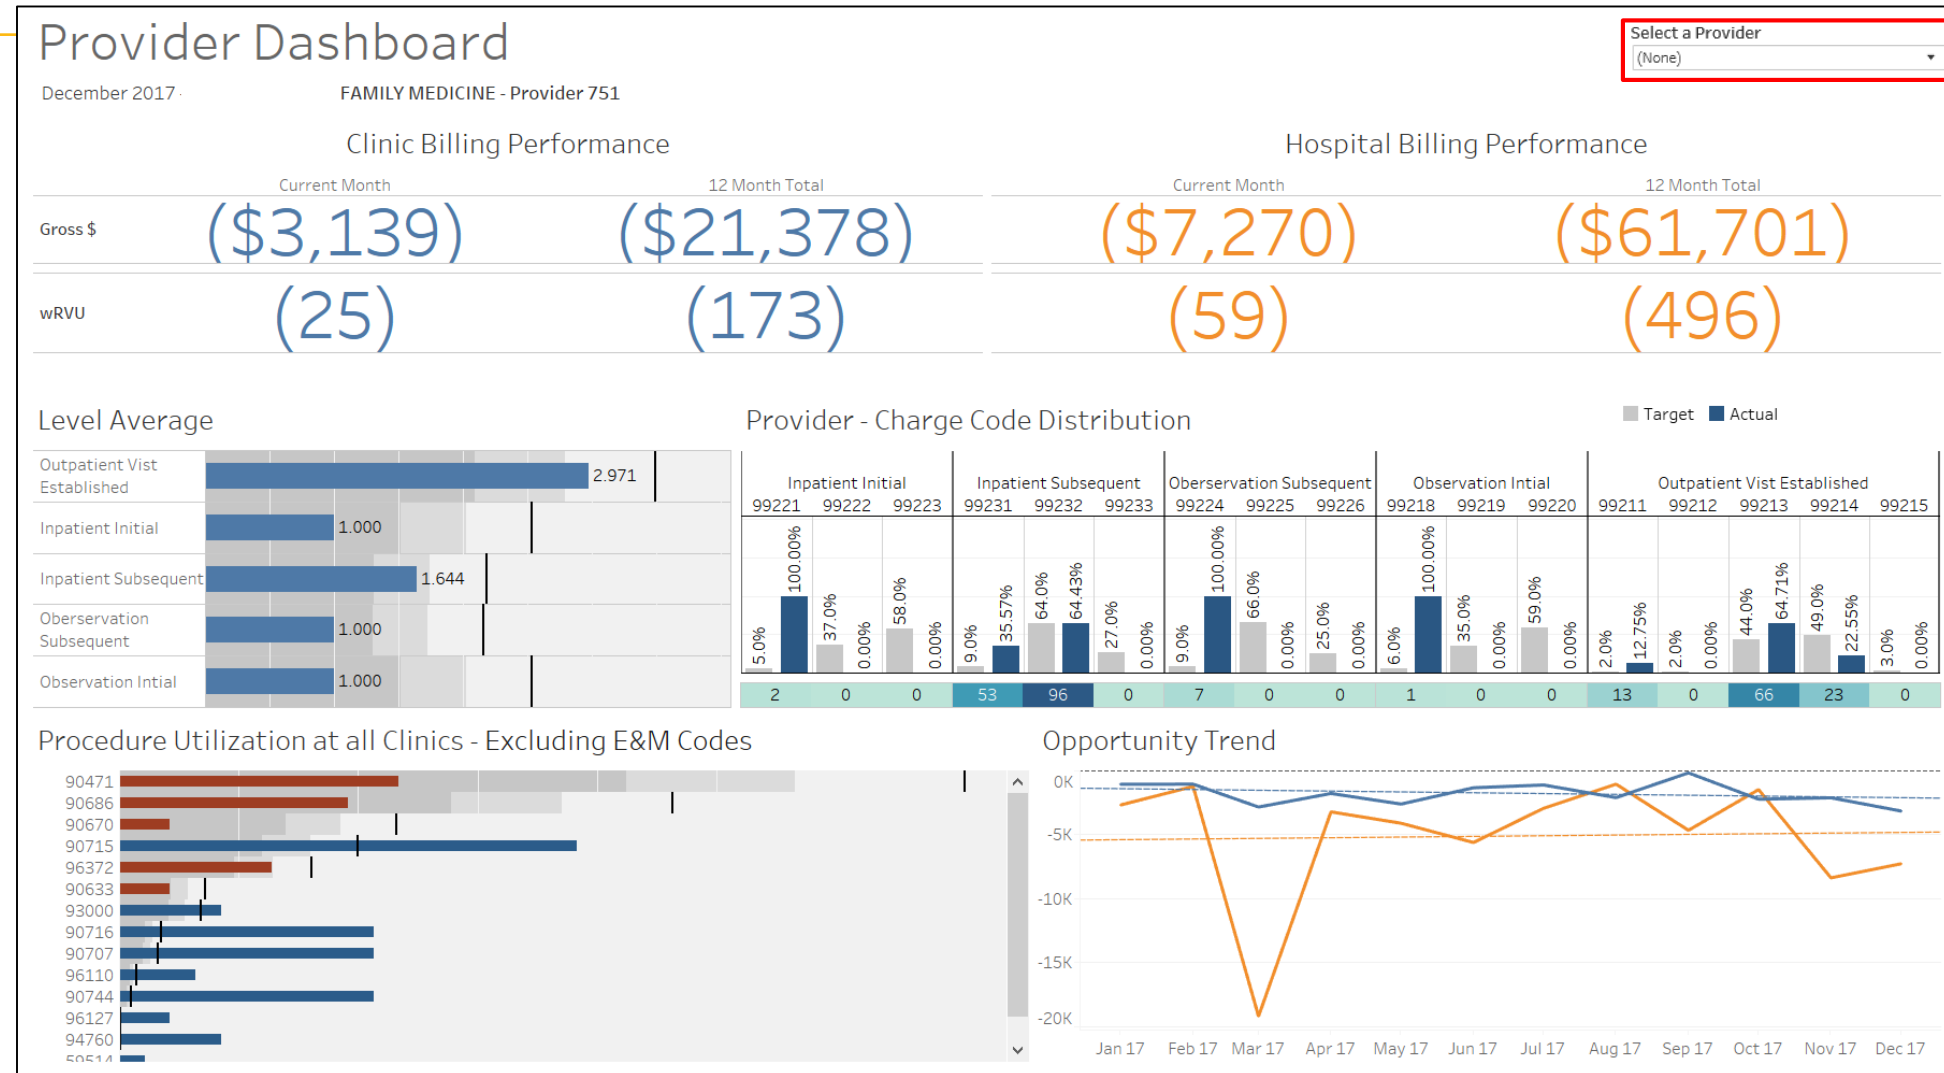

Opportunity Trend

- Procedure utilization graph allows providers to compare their non-E&M procedure code billing frequency to other health system providers within their specialty
- Graph displays top 15 procedure codes by specialty based on billing frequency across the health system

Provider Billing and Coding Dashboard

Polling Question #5

- Which of the following statements is **most appropriate** regarding the potential use of data to improve physician revenue integrity?
 - a) A comparison of current provider billing trends to national benchmarking data allows systems to identify clinics and specialties with the greatest opportunity for improvement
 - b) Visibility to billing trends is more important at a system level than at a clinic level because it provides additional scope and context
 - c) The best approach to revenue integrity data is a comprehensive one, utilizing both internal and external benchmarking to evaluate performance on a system and individual scale
 - d) None of the above statements is appropriate regarding the potential use of data to improve physician revenue integrity

Use of Data to Improve Charge Integrity

1. Inadequate Coding and Billing Support

- Using analytics to effectively allocate resources based on greatest opportunity

2. Decentralization

- Analyzing regional and provider utilization rates to identify outliers and target decentralized processes

3. Lack of Structured Feedback Mechanism

- Creation of top-down reporting of regional and provider billing and coding trends in order to increase accountability and awareness

Polling Question #6

- On a scale of 1-5, how would you rate your organization's current use of data in the physician revenue integrity process?
 - a) 1 (Data? What's data?)
 - b) 2
 - c) 3 (We have scratched the surface, but there's a lot of room for improvement)
 - d) 4
 - e) 5 (We are nearly optimizing the use of data in the revenue integrity process)

Conclusion

- Professional revenue processes have undergone significant changes in response to the changing healthcare marketplace
- While beneficial from a revenue standpoint, increasing provider acquisition by health systems has led to disorganized structure and difficulties in resource management
- Efficient use of data can help organizations to optimize resources, promote standardization, and improve the feedback loop between billing and providers

Thank You
