

Your boost to financial efficiency.

Crowe add-ons and
accelerators designed
for NetSuite

ORACLE®
NETSUITE

Enable your business to accelerate the way it should, with real-time data and versatile reporting that provide visibility and control to make smart decisions.

Crowe add-ons and accelerators designed for NetSuite

Crowe subscription billing

- Billing solution to automate the billing process for your subscription-based customers
- Ideal for clients that provide subscription-based products such as magazines, memberships, online storage, and others

Crowe usage billing

- Automates usage billing for storage and communication companies
- Supports contract, monthly service fee, and included/excluded usage units (monthly/annual)
- This solution accounts for purchase history and price breaks

Auto replenishment

- Allows the creation of automatic replenishment (auto ship) orders
- Allow customers to choose the frequency
- Manage customer orders, including repeat orders, with ease, remind customers about expired credit cards, and send advance shipment notifications

Crowe financials package

- Tailored financial reports for SEC data
- Customized driver and rules engine by department, account, or both

Third-party logistics integration

- Push your orders to the third party for warehouse management and automate acknowledgment, confirmation receipts, and creation of vendor invoices

Crowe approval workflow

- Build automated processes of approval, delegate tasks, and create customized reporting unique to your business and industry

Crowe job costing

- Manage WIP, accruals, inventory budgetary controls, and commitments
- Quickly sort and filter revenue, procurement cost, and other expenses.

Crowe vendor bulk pricing

- Helps manage vendor quantity-based pricing
- Automates pricing on purchase orders and vendor price sheets

Crowe install base and contracts

- A complete solution to manage your installation base and track service contracts and warranties
- Automates renewals and matches support cases with service contracts

Crowe integration designed for NetSuite and PayPal

- Merchants can use the NetSuite PayPal integration to accept all major forms of payment, including Visa, MasterCard, American Express, Discover, and debit cards
- Supports the reconciliation features

Crowe integration designed for NetSuite and Salesforce

- Offers web service and API, which enables integration with other systems
- Access and integrate the Salesforce data with any data source, from basic data loading to real-time tracking
- Real-time bi-directional integration – no waiting for third-party schedules to transfer data
- No intermediate server – your data is never outside NetSuite or Salesforce

Let's move your business forward faster, together.
