Crowe

Sustainability

Chart Your Path to Net-Zero

Start your journey to net-zero and confidently chart your path forward with Crowe's bespoke sustainability and climate change services.

In a world increasingly influenced by carbon taxes and net-zero commitments, understanding and managing your company's environmental impact is no longer just a nice-to-have; it is a business necessity.

By embracing change and leading the way in sustainability, your company can position itself as a forward-thinking, proactive organisation. Align your business with international standards like GRI, TCFD and ISSB, and make the commitment to plan for a green future.

Sustainability Reporting

Climate Reporting & Strategies

Other ESG Services

Sustainability Reporting

Sustainability Reporting

Documenting an organisation's environmental, social and governance performance in accordance with GRI, TCFD, and ISSB standards, ensuring transparency and accountability to stakeholders.

Stakeholder Engagement & Materiality Analysis

Engage with stakeholders to identify and prioritise sustainability issues of greatest importance.

Carbon Inventory & Carbon Footprint Computation

Measuring the total greenhouse gas emissions caused directly and indirectly by an organisation, product, or event (including Scope 1, 2 and 3).

Internal Audit

Reviewing and ensuring compliance with sustainability reporting best practices, specifically for entities listed on the Singapore Exchange (SGX).

External Audit

Independent review of an organisation's sustainability practices and reporting. With effect from 2027, Scope 1 and 2 emissions for all SGX listed companies will be required to be subjected to limited assurance audits.

Climate Reporting & Strategies

Climate Risk Assessment

Analysing and identifying potential climate risks (i.e. physical and transition risks) that could affect an organisation's operations or investments.

Resource Monitoring Systems

Utilising Internet of Things (IoT) devices to track and manage the use of resources, ensuring efficient consumption.

Science-Based Target Setting

Establishing and committing to carbon reduction goals based on scientific data to limit global warming.

Net Zero Roadmap Planning

Creating a strategic plan for an organisation to achieve net zero carbon emissions, balancing out the amount of emitted greenhouse gases with an equivalent amount offset.

Emissions Reduction Strategies

Developing and implementing plans to decrease the amount of greenhouse gases produced by an organisation.

Other ESG Services

Training
Providing education and knowledge to teams or individuals on sustainability and climate change topics.

ESG Due Diligence
Investigating and evaluating a company's environmental, social, and governance (ESG) practices, ensuring they meet standards and expectations.

Chief Sustainability Officer (CSO)-as-a-Service
Offering expert guidance on sustainability matters on a service basis, without the need for a full-time position.

Carbon Credits Consulting
Advising on the feasibility and implementation of carbon credit programs, ensuring they align with recognised standards such as Verra or Gold Standard requirements.

Green Financing Consulting
Advising on financial investments and strategies that promote environmentally-friendly projects or initiatives.
