

# CharityMagique

## Improve risk management in your organisation

CharityMagique is a bespoke, user friendly, non-profit risk management tool. Tailored based on Crowe's extensive knowledge of risk management in the charity and non-profit sector, CharityMagique allows organisations of all sizes across the industry to seamlessly identify, quantify, assess and control risks, and to embed risk management within the organisation.

### Best Practice

Adheres to CC26 (Charities and Risk Management guidance from the Charity Commission). Facilitates efficient charity risk management processes.

### Supports effective risk management

Allows users to easily capture, track and mitigate risk across the organisation (including directorate, function, branch, project). Enables dynamic reporting to drive the right conversations.

### User Friendly

Flexible and user-friendly, the web-based system allows multiple risk owners to update risks concurrently, reducing time spent on admin, and allowing more time to be spent managing risk.

### Secure

Audited to BSI standards and Cyber Essentials Plus certified, with regular penetration testing undertaken. Data is hosted in an ISO27001 certified, UK based data centre.

## Start the conversation

Please contact us to discuss how the CharityMagique solution can improve risk management at your organisation, or to arrange a demo of the software.

## Enhance your risk management capabilities

- Add risks from an existing risk register or from our pre-populated library of risks.
- Assign risks to risk owners across the organisation.
- Assess and track inherent, residual and target risks, and track risk rating changes over time.
- Follow up with risk owners to update risks.
- Monitor the impact of controls and mitigating actions.
- An easily accessible dashboard provides an instant visual overview of risk and controls across the organisation.
- Provides comprehensive analysis and reporting functionality, including risk heat map, risk register, control and action reports.
